

Week 6 — Open It on Your Phone

Name: Sibgha Mursaleen

Date: 23/08/2026

Portfolio Mobile & Accessibility Review

Live Portfolio:

<https://sibghamursaleen.vercel.app/>

Objective

I reviewed my live portfolio on a real mobile phone to make sure that the layout, text, buttons, links, and project sections work correctly on smaller screens. I also checked the portfolio on larger screen sizes to ensure that the mobile fixes did not affect the desktop layout.

Issues Found and Fixed

Issue Found	Action Taken	Result
Degree was displayed as BS (Hons)	Changed it to BE Computer Systems Engineering	Education information is now accurate
A small box was overlapping the Currently Building section on mobile	Fixed the responsive positioning and spacing	The section now displays correctly without overlap

Before & After

Issue 1 — Education

Before:

BS (Hons)

After:

BE Computer Systems Engineering

Issue 2 — Currently Building

Before:

A small element overlapped the Currently Building section on mobile.

After:

The responsive layout was adjusted so the elements no longer overlap.

Conclusion

Testing the portfolio on a real phone helped me find problems that were not obvious when viewing it on a desktop. I fixed the incorrect degree information and the mobile layout overlap, then checked the portfolio again to make sure the main sections and links were working correctly.

Result: The portfolio is now checked and functional across mobile and larger screen sizes.
